Cc Councillor Tom Daly for information

DC/23/3441/DRR | Bespoke Mitigation Plan for the Land East of Eastlands Industrial Estate (LEEIE) Advanced Works, secured by the Noise Monitoring and Management Plan under Requirement 2 (Code of Construction Practice) of the Sizewell C Development Consent Order

TASC strongly objects to this additional plan for Land East of Eastlands Industrial Estate (LEEIE) and cannot understand why this is being treated as a separate matter to the original “plan” for discharge of requirements, DC/23/2730/DRR.

We have already pointed out in our response dated 30th July 2023 to the original LEEIE application for discharge of requirement 2, that there is no appropriate plan for this site registered under the DCO approval. SZC Co have failed to provide any detailed plans which, we submit, should be accompanied by scale drawings of elevation and floor plan, the location of and access/exit points for services such as sustainable drainage, flood attenuation/drainage, power lines, lighting, potable water, and dust suppression water supplies, together with details of highway access and rail routes.

TASC respectfully requests that the applicant be required to supply full and comprehensive planning drawings for this 30ha site which could have a major impact on the AONB and Leiston Town. TASC further requests that this matter is treated as either a material change to the DCO or dealt with through the local planning process requiring full consultation with all relevant agencies and parishes.

Mike Taylor for TASC
